

Available in Acrylic and Polycarbonate

## First Surface Mirror

Two-sided mirror which reflects incident light in either direction. The dual surface reflection is ideal for applications where the back of the mirror remains exposed, or where a reflection in both directions is desired.

- Available in 8' x 4' (2440 x 1220 approx.) standard sheet size
- Available in 3 and 6mm thicknesses

- Available colours 2422 Amber, 1000 Blue, 2069 Blue, 2424 Blue, 1600 Bronze, 2404 Bronze, 1300 Gold, 1050 Grey, 2064 Grey, 2414 Green, 4674 Green, 1119 Orange, 1450 Pink, 1020 Purple, 1310 Red, 1400 Red, 2423 Red, 2120 Teal, 2208 Yellow
- 3-mill film standard on the front
- ARmadillo scratch-resistant coating available

## **Textured Acrylic Mirror**

An interesting texture for special design needs;

PL-21 Prismatic Pattern

Available in 3mm standard thickness

Available in 8 x 4 (2440 x1220 approx.) standard sheet size

### KSH® -23 Lighting Sheet

A clear acrylic lens with a unique combination of bold, shallow optics, providing excellent retention of the lens' surface texture and uniform surface appearance in fluorescent troffers. The trussshaped prism design provides an economical solution to sagging lens problems.

The KSH® -23 sheet provides:-

- High level of efficiency
- Eliminates lamp images
- Eliminates sagging

#### **PETG Mirror**

Combines versatile fabrication properties with good impact strength, good design flexibility and speed of fabrication. Thinner-gauge sheet is ideal for children's toys, cosmetic uses and office supplies.

- Available in 8' x 4' (2440 x 1220 approx.) standard sheet size
- Available in 1mm, 1.5mm and 3mm thicknesses
- Supplied with polyfilm or polymask

#### **Anti-Fog Mirror**

The anti-fog coating is applied to high quality FABBACK® acrylic mirror and polycarbonate mirror in a Class 10 certified clean room. Anti-Fog mirror is engineered to withstand fogging under the toughest conditions. Commonly used in shaving/ shower mirrors, dental mirrors, and sauna, health club applications.

- Available in 8' x 4' (2410 x 1160 approx.) standard sheet size
- Available in 3mm

#### **Polycarbonate Mirror**

Offers excellent strength, security and flame resistance

- Available in 8' x 4' (2440 x 1220 approx.) standard sheet size
- Available in 3 and 6mm thicknesses
- See-Thru and First Surface sheet available
- Armadillo scratch-resistant coating available
- Supplied with either Polymasking film on the front or two-sided papermask

#### **Non-Glare Mirror**

Optix continuously processed non-glare acrylic

- Available in 8' x 4' (2440 x 1220 approx.) standard sheet size
- Available in 3mm

All mirror acrylic sheet is produced with a 1" (25mm approx.) overage on length and width.

FABBACK® mirrored acrylic sheet features the industry's toughest protective back-coating. The durability of this sheet makes it virtually scratch-resistant fabrication

# **QUALITY YOU CAN TRUST**

Founded in 1950, Plaskolite is a leading manufacturer of acrylic, thermoplastic and mirrored sheet. Mirrored sheet is widely used as a replacement for glass mirror, especially where safety is a concern, freeing creative designers from the limitations of ordinary glass.

# The products you want

Mirrored sheet is available in:

- Acrylic the most popular mirror substrate, with the widest range of thicknesses, colours, sizes and patterns
- PETG stronger than acrylic. Can be cold formed, die cut or punched
- Polycarbonate recommended when high impact strength and heat and flame resistance are required.

## **Ready to fabricate**

Plaskolite mirrored sheet can be laser cut, saw cut, router cut, bevelled, cemented or printed. It is ideal for retail slat wall, cosmetic displays, table top P.O.P, toys, fixtures and signage.

Available backings and coverings include:

- FABBACK® the industry's toughest, most durable backing for protecting against scratches
- Standard covering white or brown papermask
