

Lunar Panels

Lunar Panels may be used in many applications. One of the primary applications is for decorative wall hangings. "Lunar Panels" provide a 1/2" flange for attaching either a wooden or metal frame. With the various sizes available in "Lunar Panels" most wall sizes may be accommodated. The convex panels may be used to create a very interesting look.

Children's play areas may be enhanced using concave models which give the children a mirage of endless images of themselves in an upside down display. Using the "Lunar Panel" in these applications can open a child's imagination.

"Lunar Panels" have been used often in the movie industry to create sci-fi looks in today's space or in the future movies.

The possibilities are limited only by the imagination of the designer.
